Objective

- 3+ years of software development experience for a wide range of applications using many different technologies
- Proven ability to leverage object oriented programming and system design to improve the performance of many systems

Experience

SOFTWARE DEVELOPER | SENSORS & SOFTWARE | MAY 2019 - PRESENT

- Designed and maintained several C++ and Python based APIs for various embedded and desktop applications. Some APIs include a custom REST APIs, networking library, and a common sensor library
- Improved the performance of the radar collection API by 150%, which allowed customers to collect radar data at much faster rate
- Successfully built virtual environments using Docker and GitHub workflows
- Mentored several new developers within the Engineering team
- Provided insight as a subject matter expert for data communication and backend technologies for next generation software

SOFTWARE ANALYST INTERN | THALES | MAY 2018 – AUGUST 2018

- Assisted with the implementation of autonomous train positioning solutions and vehicle detection
- Improved the performance of the image processing code through multithreading and targeting the GPU
- Enhanced the image quality of the camera, and implemented real-time adaptive lighting

IT DEVELOPER INTERN | TD BANK | MAY 2017 – AUGUST 2017

- Created and deployed automated testing scripts using Selenium and JUnit to notify a team of developers when errors exist within TeamSite
- Applied Agile Methodologies

Skills

LANGUAGES

- C++
- Python
- JavaScript
- Bash / Shell

PLATFORMS/TOOLS

- GitHub
- Vue.js
- pytest
- JSON-RPC
- Docker
- Linux
- Boost
- Kubernetes

Education

BACHELOR OF APPLIED SCIENCE | MAY 2019 | UNIVERSITY OF OTTAWA

- Major: Computer Engineering
